

A free AI app library — for your school

27+ free web apps that let students learn AI, maths and coding by doing, and make teachers' everyday work easier. In 12 Indian languages, with no sign-up and no ads.

What is it?

27+ apps that run in the browser on smartboards, laptops and phones: learning AI, maths, Python and SQL, languages and digital safety, plus teacher tools such as quizzes, attendance, report cards and worksheets. New apps are added every month.

Why use it?

- Students learn AI by doing, not memorising: neural networks, chatbots, model evaluation
- Apps linked to CBSE AI curriculum topics, such as the AI project cycle
- No licence fees, nothing to install, no IT support needed

How to start

1. Open apnipathshala.ai on the classroom smartboard
2. Choose your language at the top
3. Share an app link with students or parents on WhatsApp
4. No internet? Download the whole library as one ZIP

Safe for children

- No accounts, no log-in, no ads, no tracking
- Whatever students type stays on their own device
- Open source (MIT licence): anyone can check the code
- Free, with no hidden fees

8 apps to start with

Quiz Maker & Player
All classes
