AI Classroom Starter Pack

For teachers of Classes 6–12: everything for your first AI week

Inside this pack

3

10 ready AI prompts (in Hindi, with English)

Lesson plans, MCQs, worksheets, rubrics, parent messages...

5

A 1-week plan with 5 of our apps

40 minutes a day: start, app, talk, exit ticket

7

CBSE AI: which app for which chapter

Classes 9–12, subject codes 417 and 843

8

Classroom safety rules for AI

For students and teachers, ready to put on the wall

9

Printable QR sheet

12 useful apps: scan and open

No sign-up for students

Students' data stays on their device

12 Indian languages

Works offline after the first visit

Scan: everything for schools

apnipathshala.ai/schools.html

77 free apps · 12 Indian languages · no sign-up and no ads for students

October 2026

Start here

15 minutes to get ready, and AI in your classroom from Monday.

1 Open apnipathshala.ai on a phone or computer

Pick your language at the top. No account, no password.

2 Read Monday's lesson on pages 5–6

Open that day's app once to try it. The first visit needs internet; after that the app also opens offline.

3 In class, open the app on the smartboard or projector

Only one phone? Show it to the class, or pass it from group to group.

✓ About our apps

- Completely free: no fees, nothing hidden
- No sign-up, no ads and no tracking for students
- What students type stays on their device (except the optional Live Quiz)
- 12 Indian languages, on smartboards, laptops and low-cost Android phones
- No internet? Download the whole library as a ZIP (page 10)

⚠ Two things about AI chatbots (ChatGPT, Gemini...)

- The prompts on pages 3–4 are for teachers: type or copy them into any free AI chatbot, and check the answers yourself.
- Many AI chatbots are only for ages 13 and up, and under-18s need a parent's permission. With younger students, run the tool yourself and show it on the projector.
- Never type students' names, marks, photos or phone numbers into any AI tool.

📱 Few devices? That is fine

- One phone and a speaker are enough: open the app, show the class, pass it round the groups.
- No power or projector: print the QR sheet on page 9; many apps also print worksheets and cards.

📋 Getting ready for week 1: checklist

- | | |
|--|---|
| ☐ Opened the 5 apps for Monday to Friday once (pages 5–6) | ☐ A camera or a few photos ready for Tuesday |
| ☐ Projector, smartboard or phone + speaker ready | ☐ Sent parents a short message (prompt 8 can help) |
| ☐ Printed page 8 (safety rules) and page 9 (QR sheet) | ☐ Chart paper and sketch pens for Friday |

10 ready AI prompts for teachers

Type or copy the Hindi prompt into any free AI chatbot (the English version is below it). Change the coloured [] parts for your class.

- ✓ Always check an AI answer before you use it in class.
- ✓ Never type any personal details of students.
- ✓ Not happy? Say: "make it simpler", "give it as a table", "add the answers".

1Lesson plan

आप एक अनुभवी CBSE शिक्षक हैं। कक्षा [8] के लिए विषय [प्रकाश का परावर्तन] पर 40 मिनट की पाठ योजना हिंदी में बनाइए। इसमें लिखें: सीखने के 3 उद्देश्य, 5 मिनट की रोचक शुरुआत, बिना महँगे सामान वाली एक कक्षा गतिविधि, समझ जाँचने के 3 प्रश्न और गृहकार्य। भाषा सरल रखें।

In English: You are an experienced CBSE teacher. Make a 40-minute lesson plan in Hindi for Class [8] on [reflection of light]: 3 learning goals, a 5-minute interesting start, one class activity with no costly material, 3 check questions and homework. Keep the language simple.

Tip: Change the [] parts. Too long? Write: "Make it half as long."

2MCQ quiz

कक्षा [7] के विषय [भिन्न] पर 10 बहुविकल्पीय प्रश्न (MCQ) हिंदी में बनाइए। हर प्रश्न के 4 विकल्प हों। सही उत्तर अलग से लिखें और हर उत्तर का कारण एक पंक्ति में दें। 3 आसान, 4 मध्यम और 3 कठिन प्रश्न रखें।

In English: Write 10 multiple-choice questions in Hindi for Class [7] on [fractions], 4 options each. List the correct answers separately with a one-line reason. Make 3 easy, 4 medium and 3 hard.

Tip: Check the questions, then put them in our Quiz Maker app: a team quiz on the projector or practice by WhatsApp link.

3Explain it simply

[प्रकाश संश्लेषण] को कक्षा [6] के बच्चे को गाँव के खेत का उदाहरण देकर समझाइए। 150 शब्दों से कम, छोटे वाक्य। अंत में 2 प्रश्न दें जिनसे पता चले कि बच्चा समझा या नहीं।

In English: Explain [photosynthesis] to a Class [6] child with an example from a village farm. Under 150 words, short sentences. End with 2 questions that show whether the child understood.

Tip: Ask for a local example, e.g. "use an example from a village in Bihar".

4Worksheet

कक्षा [5] के लिए [समय और घड़ी] पर एक वर्कशीट बनाइए: 5 रिक्त स्थान, 5 सही/गलत, 3 छोटे प्रश्न और 1 चित्र बनाने वाला प्रश्न। उत्तर कुंजी अंत में अलग से दें।

In English: Make a worksheet for Class [5] on [time and clocks]: 5 fill-in-the-blanks, 5 true/false, 3 short questions and 1 drawing question. Put the answer key at the end.

Tip: For maths drills, our Maths Worksheet Generator makes fresh sheets with answer keys.

5Practice at three levels

विषय [वाक्य के भेद] पर एक ही अभ्यास के तीन स्तर बनाइए: (क) जिन बच्चों को मदद चाहिए, (ख) सामान्य स्तर, (ग) तेज़ सीखने वालों के लिए चुनौती। हर स्तर में 4 प्रश्न हों।

In English: On [kinds of sentences], make the same practice at three levels: (a) for children who need help, (b) regular, (c) a challenge for fast learners. 4 questions per level.

Tip: Use our Name Picker & Groups app to make the groups.

10 ready AI prompts for teachers (continued)

6

Common mistakes

कक्षा [9] के बच्चे [गुणात्मक संख्याओं के गुणा] में अक्सर कौन-सी 5 गलतियाँ करते हैं? हर गलती का कारण, उसे पकड़ने वाला एक प्रश्न और 2 मिनट में सुधारने का तरीका बताइए।

In English: Which 5 mistakes do Class [9] students often make in [multiplying negative numbers]? For each: why it happens, one question that catches it, and a 2-minute way to fix it.

Tip: Most useful right after you check test papers.

7

Assessment rubric

कक्षा [10] के [AI प्रोजेक्ट] के लिए 4 मानदंडों वाला मूल्यांकन रूब्रिक तालिका में बनाइए: उत्कृष्ट, अच्छा, ठीक, सुधार चाहिए। मानदंड: विचार, काम का तरीका, प्रस्तुति, टीमवर्क।

In English: Make a 4-criteria assessment rubric as a table for a Class [10] [AI project]: Excellent, Good, Fair, Needs work. Criteria: idea, method, presentation, teamwork.

Tip: Show the rubric to students before they start.

8

Message to parents

अभिभावकों के लिए [अगले सोमवार से यूनिट टेस्ट] के बारे में एक छोटा, विनम्र WhatsApp संदेश हिंदी में लिखिए। 60 शब्दों से कम, तारीख और तैयारी के 2 सुझाव के साथ। किसी बच्चे का नाम न लिखें।

In English: Write a short, polite WhatsApp message in Hindi for parents about [unit tests from next Monday]. Under 60 words, with the date and 2 preparation tips. Do not name any child.

Tip: Check the date and details yourself before sending.

9

Story and role-play

[जल चक्र] पर कक्षा [4] के लिए भारतीय पात्रों वाली एक छोटी कहानी लिखिए, 200 शब्दों से कम। फिर उसी पर 10 मिनट का रोल-प्ले बनाइए जिसमें 6 बच्चे भाग ले सकें।

In English: Write a short story for Class [4] on [the water cycle] with Indian characters, under 200 words. Then make a 10-minute role-play on it for 6 children.

Tip: Ask it to use places near your school.

10

AI project outline

कक्षा [10] के AI विद्यार्थियों के लिए आस-पास की किसी समस्या (जैसे [स्कूल में पानी की बर्बादी]) पर AI प्रोजेक्ट का खाका बनाइए, AI प्रोजेक्ट साइकिल के चरणों में: समस्या पहचान, डेटा जुटाना, डेटा समझना, मॉडल, मूल्यांकन। हर चरण में बच्चे क्या करेंगे, 2-3 पंक्तियों में।

In English: For Class [10] AI students, outline an AI project on a local problem (e.g. [water wastage at school]) using the AI project cycle: problem scoping, data acquisition, data exploration, modelling, evaluation. 2-3 lines per stage on what students will do.

Tip: In our AI Project Cycle Canvas app, students fill in each stage and print it.

Your first AI week: 5 days, 5 apps

Classes 6–10 · one 40-minute period a day · every app is free, no sign-up. Scan the QR or type the address.

Monday What is AI?

AI or Not? Sorting Game Class 3–10

Goal: Students tell which everyday things use AI and why: AI learns from data and makes predictions.

5 min Start: "What is the smartest machine in your home?" Write 6 answers on the board.

20 min App: read the cards on the projector and vote with raised hands: "Uses AI" or "No AI". Then press "Check answers" and read each reason.

10 min Talk: the three signs of AI: it learns from data, it predicts, it gets better with experience. Sort the 6 board answers again.

5 min Exit ticket: write 2 things that use AI and 1 that does not, with reasons.

You need: Projector or one phone · internet only the first time · the worksheet can be printed

Scan to open
apnpathshala.ai/apps/ai-around-us

Tuesday How does AI learn? Data and bias

Teach the Computer (Image AI) Class 5–12

Goal: Teach the computer with examples (training data) and see that too little or one-sided data makes AI go wrong.

5 min Start: how did a small child learn what a cat is? By seeing many cats!

20 min App: make two classes (e.g. "pen" and "book") and a "Nothing" class. Record 30–50 examples per class, then test it live.

10 min Experiment: train with blue pens only, then show a red pen. Why did the AI miss? Why must data be varied and fair to everyone?

5 min Exit ticket: write one reason why an AI makes mistakes.

You need: Laptop or phone with a camera (or upload photos) · internet the first time · pictures never leave the device

Scan to open
apnpathshala.ai/apps/teachable-machine

Wednesday How do chatbots write?

Next-Word Predictor Class 6–12

Goal: Understand that generative AI writes by guessing the next word, so it can write wrong things very confidently.

5 min Game: "Today the rain is very ..." The class says the next word. Which word came most often?

20 min App: train the model on the sample story. Each time, the class guesses the next word first, then the model. Then type in a textbook poem and let it write a new one.

10 min Talk: what changed with the creativity slider at 0 and at 2? Does the model know the "truth", or only the order of words?

5 min Exit ticket: "Why does a chatbot sometimes write wrong things?"

You need: Projector or phone · works without internet after the first visit

Scan to open
apnpathshala.ai/apps/next-word-predictor

Thursday Asking AI well (prompts) **Prompt Builder** Class 6–12

Goal: Learn the parts of a good prompt: role, task, context, audience, format; and how to use AI safely.

- 5 min** Start: write a weak prompt on the board: "tell me about plants". What is missing?
- 20 min** App: each group picks a template, builds a prompt, checks the quality meter and reads its prompt aloud.
- 10 min** The teacher runs the weak and the strong prompt in a free AI chatbot on the projector; the class compares the answers. Read the safety tips in the app.
- 5 min** Exit ticket: rewrite the weak prompt into a good one.

You need: Projector or phone · only the teacher runs the chatbot part (age rules: page 8)

Scan to open
apnipathshala.ai/apps/prompt-builder

Friday Using AI fairly and safely **AI Ethics Discussion Cards** Class 8–12

Goal: Discuss real-life situations, learn the 6 principles of responsible AI, and make the class's own AI rules.

- 5 min** Question: "If an AI wrote your homework, is it your work?"
- 20 min** App: read 2 stories, vote live and discuss in timed groups. In Classes 6–7 pick one easy story.
- 10 min** Read the rules on page 8. The class chooses its own 5 AI rules and writes them on chart paper.
- 5 min** Exit ticket: "I will use AI for ..., but not for ..."

You need: Projector or phone · the discussion cards can also be printed

Scan to open
apnipathshala.ai/apps/ai-ethics-dilemmas

 Saturday bonus: a 10-minute quiz

The 30 MCQs of "AI Basics Quiz" (CBSE AI 417): play in teams on the projector. To make your own quiz, use "Quiz Maker".

apnipathshala.ai/apps/ai-basics-quiz

 **By the end of the week, students can explain**

- what AI is and where it is around us
- how AI learns from data, and why it makes mistakes
- how chatbots write by guessing the next word
- how to write a good prompt
- the rules for using AI fairly and safely

 4 more apps for next week

The same 40 minutes: start, app, talk, exit ticket. QR codes on page 9 and at apnipathshala.ai.

 Train a Mood Detector Class 7–12

Teach a computer to spot happy, sad or angry sentences just by counting words, then try to fool it.

 Build a Chatbot Class 5–12

Build a rule-based chatbot with intents and example phrases, chat with it, and see how it matches words to pick a reply.

 Decision Tree Lab Class 6–12

Build a decision tree by hand, test it on new animals or weather days, and compare it with the computer's Gini tree.

 Is My AI Good? (Evaluation) Class 9–12

Move a threshold, fill the confusion matrix and see Accuracy, Precision, Recall and F1 change live, for CBSE Class 10 AI.

CBSE AI: which app for which chapter

Our suggested match with the CBSE curriculum for session 2026-27. This is not an official CBSE resource; please check the latest syllabus on cbseacademic.nic.in.

Class 9 · Artificial Intelligence (417)

Unit 1	AI Reflection, Project Cycle and Ethics	 AI or Not? Sorting Game  AI Project Cycle Canvas  AI Ethics Discussion Cards  AI Basics Quiz
Unit 2	Data Literacy	 Statistics Calculator
Unit 3	Math for AI (Statistics and Probability)	 Statistics Calculator  Probability Lab
Unit 4	Introduction to Generative AI	 Prompt Builder  Next-Word Predictor  Token Explorer
Unit 5	Introduction to Python	 Python Playground

Class 10 · Artificial Intelligence (417)

Unit 1	Revisiting AI Project Cycle and Ethical Frameworks for AI	 AI Project Cycle Canvas  AI Ethics Discussion Cards
Unit 2	Advanced Concepts of Modeling in AI	 Teach the Computer (Image AI)  Decision Tree Lab  Clustering Lab (k-means)  Neural Network Playground  Robot Learns by Reward
Unit 3	Evaluating Models	 Is My AI Good? (Evaluation)
Unit 4	Statistical Data	 Statistics Calculator
Unit 5	Computer Vision	 How Computers See  Teach the Computer (Image AI)
Unit 6	Natural Language Processing (NLP)	 Build a Chatbot  Token Explorer  Train a Mood Detector  Talk & Listen (Speech AI)
Unit 7	Advance Python	 Python Playground

Class 11 · Artificial Intelligence (843)

Unit 3	Python Programming	 Python Playground
Unit 4	Introduction to Capstone Project	 AI Project Cycle Canvas
Unit 5	Data Literacy: Data Collection to Data Analysis	 Statistics Calculator
Unit 6	Machine Learning Algorithms	 Line of Best Fit  Clustering Lab (k-means)  Decision Tree Lab
Unit 7	Leveraging Linguistics and Computer Science (NLP)	 Build a Chatbot  Train a Mood Detector  Token Explorer
Unit 8	AI Ethics and Values	 AI Ethics Discussion Cards

Class 12 · Artificial Intelligence (843)

Unit 1	Python Programming II	 Python Playground
Unit 3	Making Machines See (Computer Vision)	 How Computers See  Teach the Computer (Image AI)
Unit 6	Understanding Neural Networks	 Neural Network Playground
Unit 7	Generative AI	 Next-Word Predictor  Prompt Builder  Token Explorer

Also for Computer Science (083) and Informatics Practices (065)

- **Class 11 · Computer Science (083):** Logic Gates Lab, Number System Converter, Python Playground, Spot the Scam, Password Strength Lab
- **Class 12 · Computer Science (083):** Python Playground, SQL Playground
- **Class 11 · Informatics Practices (065):** Python Playground, SQL Playground, AI Basics Quiz, Teach the Computer (Image AI), Build a Chatbot
- **Class 12 · Informatics Practices (065):** Python Playground, SQL Playground, Spot the Scam, Password Strength Lab

The full list for all classes: apnipathshala.ai/schools.html

AI in the classroom: safety rules

Print this page and put it up in class. On Friday the class can choose its own 5 rules from it.

8 rules for students

1. Never type your name, address, phone number, photos or passwords into an AI chatbot.
2. AI can be wrong. Check every answer with your book, your teacher or a trusted source.
3. Say when AI helped you. Never hand in AI's work as your own.
4. Think first, then ask AI. AI is a thinking partner, not a replacement for thinking.
5. Never make or forward fake (deepfake) pictures or voices of anyone.
6. Be polite with AI too, and never use AI to hurt or bully anyone.
7. If something looks strange, scary or wrong, tell a teacher or parent at once.
8. Respect age limits: many AI chatbots are only for ages 13 and up.

6 points for teachers

1. Never put students' names, marks, photos, phone numbers or other personal data into online AI tools (DPDP Act 2023).
2. Before students use an AI tool, read its age limit and rules. For children under 13, run the tool yourself and show it.
3. Check AI-made questions, answers and facts yourself before using them in class.
4. Set homework that shows the student's own thinking: their experience, class discussion, hand-drawn work.
5. Talk openly about both the good and the harmful uses of AI.
6. Our apps keep students' data on their own device. For other online tools, follow your school's policy.

Our class's 5 AI rules

1. _____
2. _____
3. _____
4. _____
5. _____

Class _____ Date _____ Everyone signs ↓

QR sheet: scan and open the app

Print, cut out the cards and put them up in class or in the staff room. Each QR opens the app directly.

? Quiz Maker & Player

All classes

Make MCQ and true/false quizzes, play them on the projector with team scores, share a practice link on WhatsApp, print worksheets.

📡 Live Class Quiz

All classes

Host a live quiz on the projector. Students join on phones with a code and a nickname. Leaderboard, results CSV, free.

📋 Attendance Register

All classes

Take class attendance in seconds, see monthly % (75% alerts), export CSV and print the register. Data stays on your device.

📋 Marks & Report Cards

Class 1–12

Marks register with totals, CBSE grades, ranks, class analysis and printable report cards. Free, offline and private.

📋 Maths Worksheet Generator

Class 1–8

Printable maths worksheets with answer keys for Classes 1–8: 19 topics, Indian word problems, and on-screen practice with instant marks.

🎡 Name Picker & Groups

All classes

Spin a wheel or flip cards to pick students fairly, mark who is absent, and make balanced groups with fun names. Works offline.

⌚ Classroom Timer

All classes

Countdown, stopwatch with laps, Pomodoro and work-mode signs, big enough for the projector. Works offline.

🤖 AI or Not? Sorting Game

Class 3–10

Sort everyday things like face unlock, a fan or Google Maps into Uses AI or No AI, and learn why.

📷 Teach the Computer (Image AI)

Class 5–12

Train your own image AI with the camera or photos, test it live, and learn about features, training data and bias.

✍️ Prompt Builder

Class 6–12

Write clear prompts for any free AI chatbot: 11 templates, prompts in 12 languages, a quality meter and safety tips.

🐍 Python Playground

Class 8–12

Write and run real Python in the browser: CBSE Class 11–12 examples, input(), pandas and charts. No install.

🚩 Spot the Scam

Class 6–12

A cyber-safety game: decide if Indian SMS, WhatsApp and call messages are safe or scams, and learn the red flags.

More free help

YouTube: AI की पाठशाला

Free AI video lessons in Hindi and tutorials for our apps.

youtube.com/@Apni_Pathshala_AI

The page for schools

A one-day roll-out plan, the full CBSE list, a message for parents, questions and answers.

apnipathshala.ai/schools.html

All apps

AI, maths, science, coding, languages and teacher tools, in 12 languages.

apnipathshala.ai/

Get news of new apps (optional)

Get an email when we add new free apps or Hindi videos: apnipathshala.ai/#updates. Adults (18+) only; stop any time.

Schools without internet

The whole library in one ZIP file:

github.com/indiazenaitech-ops/ai-pathshala-apps → Code → Download ZIP. Unzip it and open index.html.

Pass this pack on to other teachers

This PDF is free: print it, copy it, send it to your school's WhatsApp group. Download: apnipathshala.ai/schools.html

After the week: 3 questions for yourself

1. What did the students enjoy most?

2. Which day was hard, and why?

3. What will I change next time?

AI की पाठशाला (AI Pathshala) is an independent, free initiative, not affiliated with CBSE or any government body. AI chatbots belong to other companies; check their own rules and age limits. Send ideas and corrections as a comment on YouTube.
